

MargateNews.net Survey

Do you use the Downtown Carwash (on State Road 7)?

Yes, it is convenient and well-priced. No, I use another carwash. Used to, but it is in disrepair too often.

Wash my own car at home

I use the one at my residence.

Margate does not have a downtown. There are \$3 dollar carwash tunnels that do the whole job. A hose station is for degreasing. Why did the city buy this turkey on a zero lot?

No, never have

Yes I use

Stopped using it since it changed hands ...went on Saturday and it took Quarters but did not work badly run

If there is no way to have a positive cash flow, then certainly the land must be put to a better use. Unfortunately the City of Margate is going to take a bath on what it paid for the land. Therefore careful thought and planning should be followed to explore other avenues of profit that can be utilized in order to recoup our losses.

Another example of the crooks at City Hall. If the City wasn't giving half the gross to their flunkies, it would bring in a profit. But why is the City in the car wash business in the first place?

it's great for residents who live in apt and condos in the area to have a place to wash their cars but many times a couple bays are out of commission, whom ever is responsible for the upkeep of this property they have done a poor job in maintaining it
