Dear Mitchell,

Every 30 seconds in America, a bankruptcy occurs due to the outrageous cost of health care. Over 46 million Americans lack insurance, and for those of us who have it, each year we face higher co-pays and premiums.

Additionally, insurance companies often do not cover the treatments or prescriptions recommended by our physicians.

The economic recession has made this problem much worse. In Florida, many families have lost their coverage due to unemployment and have no way to ensure their children can see a doctor. It is simply too expensive – the average private plan in Florida costs over \$1,000 a month for a family.

President Obama recently committed over \$600 billion in his budget to reform health care and in the coming months, Congress will be working with him on this issue. I strongly believe that ensuring all Americans have access to affordable health care is integral to turning our economy around and improving our global competitiveness.

I would greatly appreciate if you would fill out the brief survey on health care below so I can better understand your views.

With warm regards,

Robert Wexler

Your Input on Health Care

What concerns you most about the health care system?

Rising premiums, co-pays, and fees

High prescription drug costs

Insurance companies that avoid paying for necessary treatments

Fewer doctors accepting health insurance plans

Other:

Do you believe the federal government has an interest in making health care accessible to all Americans?

Yes

No

Other:

Please check off the statements you most agree with:

President Obama and Congress should not interfere with the current health insurance system.

President Obama and Congress should reform our health care system.

I support a single-payer health care system where the federal government provides health insurance to all citizens.

I support a system that would allow citizens to purchase the same health care plans provided to members of Congress.

I support health care reform, but want the option to keep the insurance plan provided by my employer.

Do you believe the federal government should negotiate with drug companies to provide lower prices for prescription drugs?

Yes

No

Other:

Optional: Feel free to share with me how the current health care system has personally affected you, your family, your coworkers, or your friends:
